

PREMIER COMPACTION SYSTEMS AS ONE OF THE FINALISTS

Recognizing Innovative Companies and Leaders

On the following pages, the New Jersey Manufacturing Extension Program (NJMEP) and the New Jersey Business & Industry Association (NJBIA), in conjunction with New Jersey Business magazine and sponsor CohnReznick, present the 2016 New Jersey Manufacturing Awards finalists, recognizing small-, medium- and large-sized manufacturers and their respected leaders who are pursuing innovative strategies in research, design and production in the Garden State. These 22 finalists are overcoming the odds in an industry that many people have written off. Better yet, they are proving them wrong, right here in New Jersey.

On October seventh, join NJMEP at its annual National Manufacturing Day celebration at The Palace at Somerset to discover who the final category winners are in this third annual awards program.
