

CONTRACTORS/SUBCONTRACTORS

Expert equipment repairs, installations, preventative maintenance, and service **PCS provides services to achieve stability in solid waste management**

Premier Compaction Systems (PCS) is currently providing expert equipment repairs, installations, preventative maintenance, and service for all phases of the waste equipment industry in the New York, New Jersey, Connecticut, and Northeastern Pennsylvania region.

The current PCS client base consists of retail, manufacturing, condo/apartment complexes, distribution, pharmaceutical, packaging, schools, hospitals, and municipalities. We offer preventive maintenance

Our Installation team are certified technical engineers trained on the use and installation of our equipment annually.

specialists, metal fabrication experts, installation and design engineers. PCS application engineers can develop a design that will save

your budget with installation costs and future repairs & maintenance.

PCS has expanded our fleet of service vehicles to meet the

needs of a growing client base. PCS has the ability to provide prompt service and repairs that do not require a second and sometimes third visit. PCS will provide an in-depth overview of the equipment being serviced while our technician is on site. This valuable service we provide our clients has saved thousands in avoided future repair costs.

PCS recently completed several installs that finished under budget, and included quality workmanship that exceeds industry standards.

PCS will visit your facility at NO CHARGE to evaluate the current condition of your equipment and make recommendations. PCS maintains a service client base of satisfied customers and will provide a list of references upon request.

Our fleet of service vehicles can provide on-site welding and fabrication. Trash chute

Self Contained Compactors

cleaning is a service recently added to our portfolio, along with both trash and linen chute design and installation. PCS follows all USGBC LEED confirmation specifications, including assisting architects and engineers with our knowledge and recommendations. PCS offers multi-lingual staff that makes service call requests simple and error free.

Solid Waste Engineering-Source Separation Programs:

PCS can provide the following services, which may be applied to your facility(s) to achieve stability in solid waste management. Our programs are strategically planned with flexibility toward changing regulations and a clear direction toward compliance. We handle design and installation of new, highly efficient waste compaction equipment. Additional services PCS can provide are as follow:

- Plant logistics and Design
- Chute repairs & cleaning
- Sustainability Compliance
- Compactor Monitoring
- Compactor/Equipment Upgrades
- Baler Installation and Service
- Education/Employee Orientation
- By-product Marketing
